

**Amendments to the Specification**

Please replace paragraph [0025] with the following amended paragraph:

[0025] One additional aspect of the present invention provides an ATV with a frame and only four wheels suspended from the frame. Two of the wheels are rear wheels and two of the wheels are front wheels. The front wheels define a front axis and the rear wheels define a rear axis, and each of the wheels includes an ATV-type tire, i.e. a low-pressure balloon tire having an air pressure of less than 1 kg/cm<sup>2</sup>. The ATV has a power unit for driving at least one of the wheels disposed on the frame and a straddle-type seat supported by the frame including a main seat portion for a driver and a secondary seat portion for the passenger. The ATV also has a steering member connected to the frame that includes a handlebar for steering at least one of the wheels. The ATV has a center of gravity and a ratio of a distance between the front axis and the center of gravity to a distance between the center of gravity and the rear axis is greater than 1.05, greater than 1.07, greater than 1.09, greater than 1.1, greater than 1.11, and between 1.05 and
